

MT-92 Antenna

Circularly Polarized Antenna

Key Features:

- UHF band antenna designed with the latest technology
- Antenna operating frequency is 902~928 MHz and it is optimized
- Provides high performance and can be used for various purposes

Antenna Spec

Frequency 902~928 MHz

Polarization Circular Type

Gain 6dBi Max

Beam Width(3dB) 70 degrees nominal

Input Impedance 50ohm

Dimension 213 x 213 mm

Bracket Support VESA Support

Weight 405g

Connector Type SMA-Female

6M Cable(SMA-TNC)

Support LHCP RL(RHCP Option)
